

# **SQL Assignments Project 1**

## **HR Database Questions And Answers (Queries)**

- 1. Write a query to display the names (first\_name, last\_name) using alias name "First Name", "Last Name"**
  - `select first_name as "First Name", last_name as "Last Name" from employees;`
  
- 2. Write a query to get unique department ID from employee table**
  - `select distinct department_id from employees;`
  
- 3. Write a query to get all employee details from the employee table order by first name, descending**
  - `select first_name from employees order by first_name desc;`
  
- 4. Write a query to get the names (first\_name, last\_name), salary, PF of all the employees (PF is calculated as 15% of salary)**
  - `select first_name, last_name, salary, salary*.15 as PF from employees;`
  
- 5. Write a query to get the employee ID, names (first\_name, last\_name), salary in ascending order of salary**
  - `select first_name, last_name, salary from employees order by salary asc;`
  
- 6. Write a query to get the total salaries payable to employees**
  - `select sum(salary) from employees;`

**7. Write a query to get the maximum and minimum salary from employees table**

- `select max(salary), min(salary) from employees;`

**8. Write a query to get the average salary and number of employees in the employees table**

- `select avg(salary), count(*) from employees;`

**9. Write a query to get the number of employees working with the company**

- `select count(*) from employees;`

**10. Write a query to get the number of jobs available in the employees table**

- `select count(distinct job_id) from employees;`

**11. Write a query get all first name from employees table in upper case**

- `select upper(first_name) from employees;`

**12. Write a query to get the first 3 characters of first name from employees table**

- `select left(first_name,3) from employees;`
- `select substring(first_name,1,3) from employees;`
- `select mid(first_name,1,3) from employees;`

**13. Write a query to get first name from employees table after removing white spaces from both side**

- `select trim(first_name) from employees;`

**14. Write a query to get the length of the employee names (first\_name, last\_name) from employees table**

- select first\_name, last\_name, length(first\_name)+length(last\_name) from employees;

**15. Write a query to check if the first\_name fields of the employees table contains numbers**

- select first\_name from employees where first\_name regexp '[0-9]';

**16. Write a query to display the name (first\_name, last\_name) and salary for all employees whose salary is not in the range \$10,000 through \$15,000**

- select first\_name, last\_name, salary from employees where salary not between 10000 and 15000;

**17. Write a query to display the name (first\_name, last\_name) and department ID of all employees in departments 30 or 100 in ascending order**

- select first\_name, last\_name, department\_id from employees where department\_id=30 or department\_id=100 order by department\_id;
- select first\_name, last\_name, department\_id from employees where department\_id in (30,100) order by department\_id;

**18. Write a query to display the name (first\_name, last\_name) and salary for all employees whose salary is not in the range \$10,000 through \$15,000 and are in department 30 or 100**

- select department\_id, first\_name, last\_name, salary from employees where salary not between 10000 and 15000 and department\_id=30 or department\_id=100 order by department\_id;
- select department\_id, first\_name, last\_name, salary from employees where salary not between 10000 and 15000 and department\_id in (30,100) order by department\_id;

**19. Write a query to display the name (first\_name, last\_name) and hire date for all employees who were hired in 1987**

- select first\_name, last\_name, hire\_date from employees where year(hire\_date)=1987;
- select first\_name, last\_name, hire\_date from employees where year(hire\_date) like '1987%';

**20. Write a query to display the first\_name of all employees who have both "b" and "c" in their first name**

- select first\_name from employees where first\_name like '%b%' and first\_name like '%c%';
